ALEAS BOARD

RELEASE #2019-10-01

WHAT IS NEW?

ALEAS BOARD RELEASE #2019-10-07

Dear ALEAS Board user,

the latest version of the ALEAS Board boasts even better performance and introduces the newly added “Presentation Mode” – among other smaller features and enhancements. Meetings with your team members abroad are going to be faster and smoother in the future!

So, what exactly is new?

added

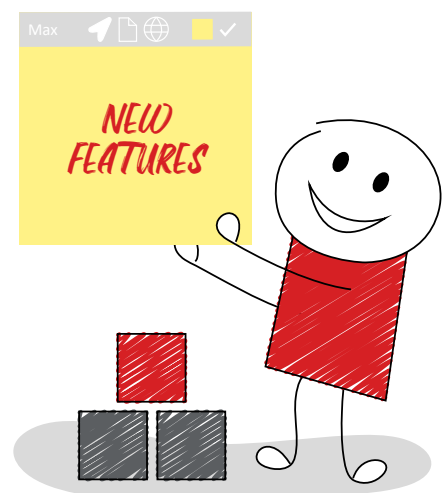

- Presentation Mode: Use the presenter icon for remote team meetings
- User Profile Settings: Choose your preferred background color and font color
- Guest User: New user role

improved

- Connection Lines: The Connection Line Mode can now be activated individually
- Performance and speed: The ALEAS Board now works faster and better than ever
- Stability: Focus on many users working at the same time on the same board

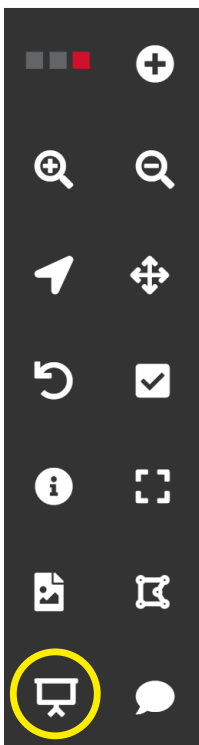

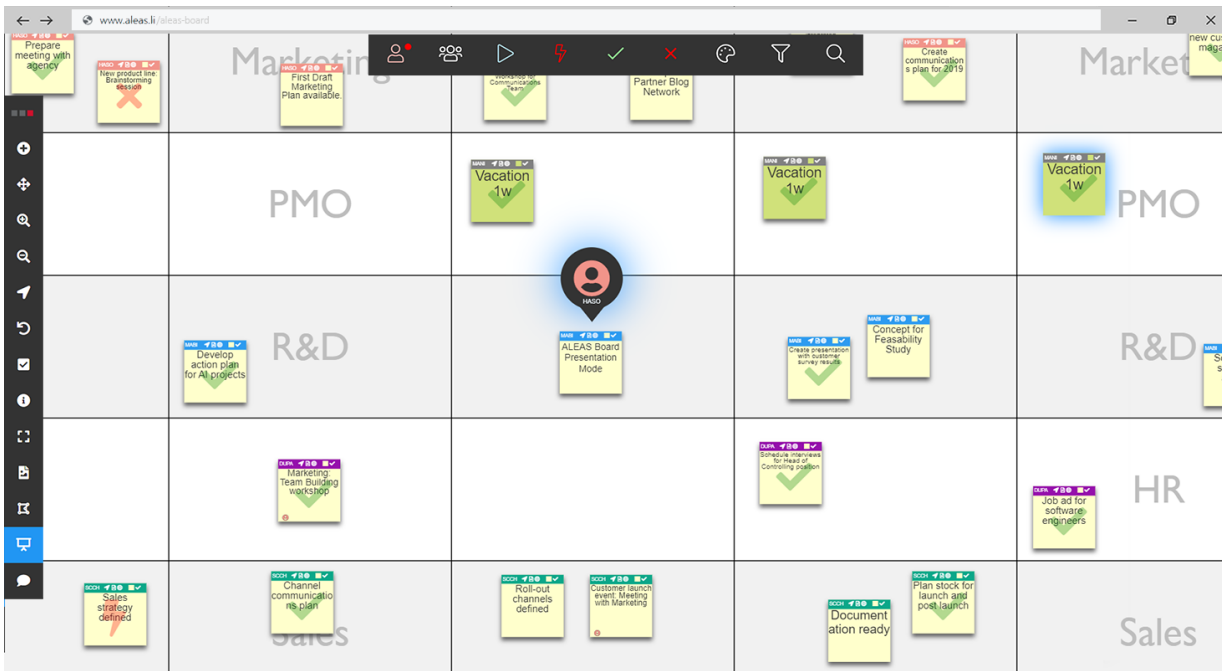

In the following we would like to introduce the new features to you in detail. As always we'll appreciate your ideas, suggestions and feedback. You can contact us at office@aleas.li.

All the best,
the ALEAS software team

PRESENTATION MODE

ALEAS BOARD RELEASE #2019-10-07

The Presentation Mode is a new feature, which is especially useful for distributed teams and will make your meetings simpler and smoother.

Once you activate the Presentation Mode in the left sidebar, the presenter icon will appear. The color and labeling will change according to the user who last moved the presenter icon. In addition, a red dot in the filter bar will indicate if you are currently the presenter.

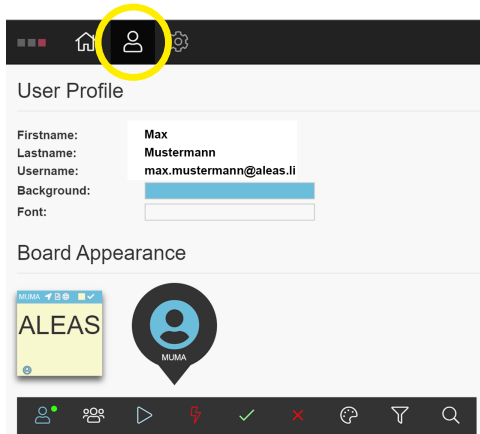

By taking over the presenter icon you can control the screen of all users who have activated the Presentation Mode, thus guiding them around the board.

Ideally, you should connect to your colleagues over the phone/Skype/Microsoft Teams at the same time. As you explain everything, you can use the Presentation Mode to enlarge the corresponding part of the ALEAS board, change the status of your stickies, add new tasks, etc. – all visible for your team members in real-time.

SMALL IMPROVEMENTS

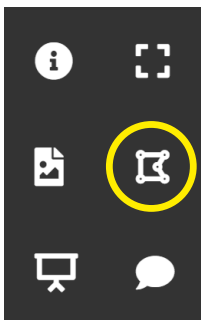

ALEAS BOARD RELEASE #2019-10-07

USER PROFILE COLOR

In your user profile settings you can now select your preferred background and font color. This will change the appearance of all your sticky notes and your user icon.

CONNECTION LINES

The Connection Line feature can now be activated individually by clicking on the icon in the left sidebar, thus making it more user-friendly and faster.

GUEST USER

At the request of our customers we have added a new user role. A „Guest User“ has the same rights as a „Standard User“, except for not having the option to create new boards on their own. Therefore they can only see the members of their assigned boards, not all licensed members of the company's ALEAS Board. This is especially useful if external team members are being assigned to certain projects.
